

Appendix G. Errata. The 2008 Water Quality and Pollution Control in Michigan 2008 Sections 303(d), 305(b), and 314 Integrated Report was submitted to the USEPA for review and approval of Michigan's list of water quality-limited or threatened waters requiring establishment of pollutant Total Maximum Daily Loads (TMDLs) on March 31, 2008. The USEPA approved the Section 303(d) portion on July 8, 2008 with the following errata (issued June 4, 2008).

1. Changes to records (ordered by assessment unit identifier [AUID])

AUID	Waterbody Name	Designated use(s)	Use support in appendices	Corrected use support	Comment
040500010111-06	Messenger Lake-Memorial Park Beach	Total Body Contact Recreation/ Partial Body Contact Recreation	Insufficient Information/Fully Supporting	Not Supporting-Category 5	Changed to correct an erroneous delisting (should not have been moved out of Category 5).
040500010706-03	Sand Lake-Nottawa Park Beach	Total Body Contact Recreation/ Partial Body Contact Recreation	Insufficient Information/Fully Supporting	Not Supporting-Category 5	Changed to correct an erroneous delisting (should not have been moved out of Category 5).
040500020301-01	Lake Michigan Rosy Mound Recreation Area Beach	Total Body Contact Recreation/ Partial Body Contact Recreation	Insufficient Information/Fully Supporting	Not Supporting-Category 5	Changed to correct an erroneous delisting (should not have been moved out of Category 5).
040500020405-02	Huizenga Park Pond Beach	Total Body Contact Recreation/ Partial Body Contact Recreation	Insufficient Information/Fully Supporting	Not Supporting-Category 5	Changed to correct an erroneous delisting (should not have been moved out of Category 5).
040500040704-01	Grand River and Red Cedar River				We are rearranging the georeferencing for this AUID, removing one NHD reach and including another. This will have no impact on any use support status, and only minimal impact on the mileage for this record.
040500060704-01	Deer Creek	Total Body Contact Recreation/ Partial Body Contact Recreation	Not Assessed	Not Supporting-Category 5	Untreated Sewage Discharge and Pathogens. Changed to correct an erroneous delisting (should not have been moved out of Category 5).
040500060712-01	Grand River-Grand Haven Boaters Park Beach	Total Body Contact Recreation/ Partial Body Contact Recreation	Insufficient Information/Fully Supporting	Not Supporting-Category 5	Changed to correct an erroneous delisting (should not have been moved out of Category 5).
040601020104-03	Houghton Lake Denton Township Public Beach	Total Body Contact Recreation/ Partial Body Contact Recreation	Insufficient Information/Fully Supporting	Not Supporting-Category 5	Changed to correct an erroneous delisting (should not have been moved out of Category 5).
040601020104-04	Houghton Lake DNR Boat Launch and Park Beach	Total Body Contact Recreation/ Partial Body Contact Recreation	Insufficient Information/Fully Supporting	Not Supporting-Category 5	Changed to correct an erroneous delisting (should not have been moved out of Category 5).

040900050404-02	Ford/Belleville Lake				The NHD incorrectly lists part of Belleville Lake as Susterka Lake, resulting in a shortage of 674 acres for this AUID. To correct this error, 674 acres are added to the existing AUID.
041000020206-01	River Raisin, South Branch				The tributaries to the main stem will be removed from the georeferencing information for this AUID. This listing should only apply to the mainstem of the River Raisin, South Branch. This will result in a slight mileage change for this record.
04050012604-03	Farmer's Creek	Total Body Contact Recreation/ Partial Body Contact Recreation	Not Assessed	Not Supporting- Category 5	Changed to correct an erroneous delisting (should not have been moved out of Category 5).

2. Addition to Section 2.18 Nonpoint Source Control. The following paragraph should be included on page 22 under *Lake Michigan Basin*.

The Menominee River watershed has a wide variety of issues that are not yet wholly covered under a watershed management plan. There are many active and interested stakeholders who have been holding discussions regarding issues in the watershed and how to locate funding for potential studies and projects. This watershed is experiencing municipal development in many areas, which increases the need for education about urban storm water runoff. The Menominee River also flows through many agricultural areas. Some areas of the watershed have mercury and PCB issues; yet, others require protection of excellent trout habitat.

3. Public comment #39. on page 108 should be attributed to the National Wildlife Federation.

4. The summary of public comment #45 on page 114 should read as follows. The response is retained as it appears in the report.

Millions of gallons of partially or untreated sewage are periodically discharged to the upper reaches of the Saginaw Bay watershed by large and small communities located in Saginaw and Genesee counties. These wastewater discharges contain various levels of fecal coliform bacteria, other pathogens and helminths (parasitic, intestinal worms) that are not affected by chlorination. Did the DEQ consider these wastewater discharges to the Saginaw Bay watershed in their development of the Section 303(d) list of water bodies that do not support their designated uses and require the development of Total Maximum Daily Loads? (Ogar)

5. The following 8 digit HUCs in Appendices A1 and A2 are missing a zero before the last digit. Correct HUCs are: 04090005, 04090004, 04090003, 04090002, 04090001, 04070007, 04070006, 04070005, 04070004, 04070003, 04050007, 04050006, 04050005, 04050004, 04050003, 04050002, 04050001, 04070002, 04070001.
